### **TSA revelation after passenger clears security spurs Miami airport scare**

(CNN) Tens of millions put their bags on a conveyor belt, walk through a metal detector, then head to their flights at American airports each year. But what happens when a Transportation Security Administration agent misses something in those seemingly routine checks? And, when they do, what does it say about how safe American travelers really are? Those are the kinds of questions being asked after a security scare effectively shut down parts of Miami International Airport, where a passenger went through security only to be chased down hours later. There ended up being no threat, though there were plenty of headaches, especially for those on the 50 flights delayed as a result. The Monday evening incident comes amid increasing attention, in the United States and elsewhere, to airport security after the October 31 crash of Metrojet Flight 9268. Some U.S. national security officials, citing intelligence information, say it's looking increasingly likely that a bomb -- somehow planted on the Russian airliner in Sharm el-Sheikh, Egypt -- brought down the plane, killing all 224 aboard. U.S. increases security measures at airports and it comes two days after U.S. Department of Homeland Security Secretary Jeh Johnson told CNN about stepped-up efforts to make sure security is being done right. "I want people to know that their aviation security officials working on their behalf are continually evaluating threats, potential threats," Johnson said. "And we make adjustments all the time based on what we see."

## **International News – Significant Events**

### **Egypt: U.S. can join investigation of Russian plane crash**

(CNN) U.S. investigators could soon get a chance to look at physical evidence from the crash of Metrojet Flight 9268 for the first time, officials said Tuesday. The U.S. National Transportation Safety Board has received word that Egypt accepted its offer to assist in the Metrojet crash investigation, a U.S. source with knowledge of the investigation said. The NTSB is waiting for more specific information on when and where the plane's engines will be brought to be examined before it dispatches a team, the source said. In an interview with CNN's "The Situation Room" Tuesday, Egyptian Foreign Minister Sameh Shoukry said his country had approved an application for American investigators to participate. "Egypt has already accepted the application of American investigators that are associated with the manufacturers of the engine to become part of the investigative team, and they are free to incorporate any advisers they deem as necessary for them to undertake the responsibility," Shoukry said. The plane's engines were built by American manufacturer Pratt & Whitney. Getting access to the wreckage could mark a significant development in the investigation, allowing U.S. officials -- who've so far relied on intelligence to assess what happened to the plane -- to see the physical evidence needed to provide definitive proof. It's unclear whether other U.S. investigators would join the NTSB team. Asked whether FBI agents could be involved, Shoukry said international investigation regulations allow Americans to tap advisers for their team. "The FBI has offered forensic assistance and other services to our partners in Egypt and Russia, and stands ready to assist," the agency said in a statement.

# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

## **Weather of Concern**

- For portions of Northern California dry weather is expected for the rest of the week, followed by yet another late weekend storm. Cold morning temperatures today will bring patchy fog and frost. A storm from the Gulf of Alaska, very similar to the ones we have had the past two weekends arrives by early Sunday. This will bring Valley rain and mountain snow. Isolated thunderstorms are also possible Sunday, and could bring locally heavy rain, with possible debris flows for recent burn areas.
- For portions of Southern California a cold and dry air mass will bring overnight low temperatures to near or below freezing to interior valleys on early today and Thursday mornings. The coldest area will be the Antelope Valley, Los Angeles County, where several hours of temperatures at or below 28 degrees are expected each morning through Thursday morning.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

#### **Eureka Weather:**

Very cool overnight temperatures are expected across interior valleys again tonight. Frost will be likely with freezing temperatures possible in a few normally colder areas. Light rain is expected north of Cape Mendocino Wednesday with widespread rain possible over the weekend.

#### **Medford Weather:**

An upper level trough and an associated cold front are making their way onshore this morning. Radar returns remain well to the north of the forecast area, but this should change as we head through the morning. Snow levels of 4000 to 5000 feet through the day will keep snow well above much of the populated areas, but some light accumulations are possible over mountain passes and portions of the east side. Precipitation will taper through this evening and into tonight.

#### **Reno Weather:**

High pressure is expected through the week with a slow warming trend. Valleys will be slower to warm than mountains under strong inversions, especially in areas that have significant snow cover. Another pacific storm is possible Sunday into Monday with increasing winds and chances for additional snowfall.

#### **San Francisco Weather:**

A ridge of high pressure will build into our region allowing for temperatures to warm for the rest of the week. Our next storm system is expected to impact the region Sunday into Monday of next week with rain likely.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

Locally patchy frost and fog is possible early this morning. Otherwise, dry weather expected for the remainder of the week. Another storm should arrive Sunday through Monday of next week bringing another round of precipitation across Northern California. Light precipitation possible across the northern forecast area continuing through the middle of next week.

#### **Hanford Weather:**

Expect dry conditions while temperatures continue below average Wednesday and into Saturday. Patchy dense fog will be possible during the nighttime and morning hours in the San Joaquin valley starting tonight. Another low pressure system will bring the next chance for precipitation to the area by Sunday.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

High pressure will move in today and will bring gusty winds with fair skies and warming temperatures through Saturday. A low will move through early next week with possible precipitation and a sharp down turn in temperatures.

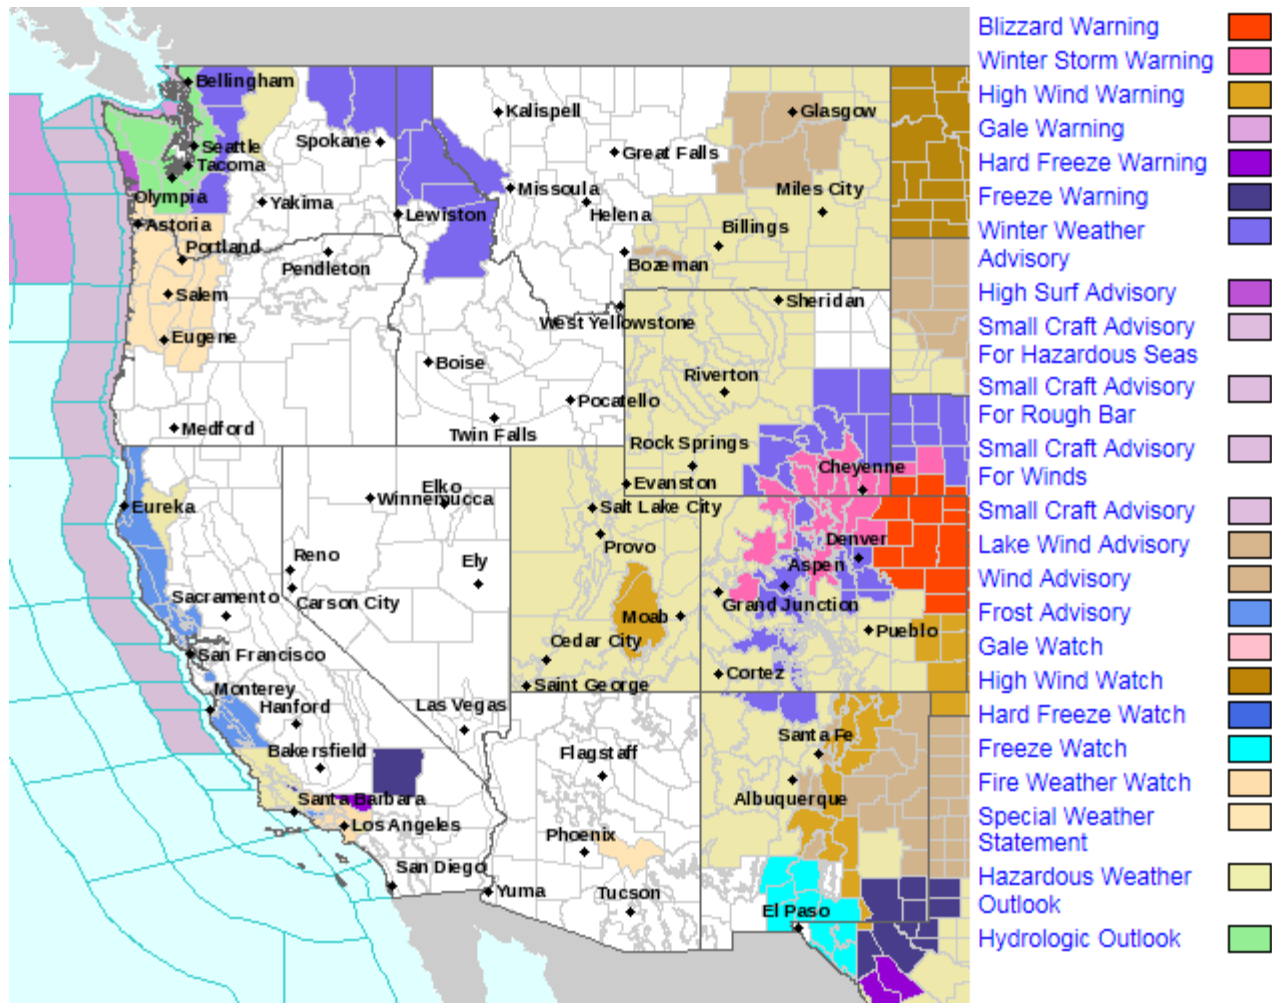

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Clear and cool this morning as surface high pressure builds over Nevada. With mostly clear, very dry and warmer through Saturday with a persistent offshore flow. A trough of low pressure will bring a cooling trend early next week with a slight chance of showers Sunday night or Monday. The offshore flow will return by the middle of next week as the trough exits the region.

#### **Southeast California Weather:**

Cooler air in the wake of a low pressure system moving through the southern Rockies will persist across the desert southwest into tonight. Freezing temperatures are possible this morning and Thursday morning near globe while high temperatures will struggle to reach 70 degrees across the lower deserts today. A warming trend will begin on Thursday with temperatures reaching near seasonal normal and lasting through the weekend. Another low pressure system for early next week may bring a slight chance of showers and cooling temperatures.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.
